

HUXLEY'S VETERINARY PREPARATIONS

Drug & Sundry List

TELEPHONE : CROYDON 3118.

[1934]

TELEGRAMS : ANGLO, CROYDON.

Prepared in the Laboratories of
ANGLO-AMERICAN PHARMACEUTICAL COMPANY, Ltd.,
GALEN WORKS, 59, DINGWALL ROAD, CROYDON.

Illustrating fac-simile packages, specially designed and printed to maintain Professional Tone

Extract from "Veterinary News," Jan. 2nd., 1915.

ANGLO-AMERICAN PHARMACEUTICAL COMPANY LTD., Dingwall Road, Croydon.

This enterprising firm supplies most useful preparations for veterinary practice, dispensed in a neat and artistic style which exerts an important influence on the question of pleasing clients. No one can deny that the method to overcome the patent medicine vendor is to supply preparations in an attractive style. No doubt this is a commercial matter, but in days of keen competition the business side of the calling needs consideration. Veterinary practice is not so lucrative that we can afford to do away with the dispensing of drugs and thus permit the "prescribing chemist" to reap the benefit. The Anglo-American Pharmaceutical Co., do not sell drugs or preparations to the lay public, and have no secret remedies as the formula of each speciality is given on request. In a busy practice various preparations must be kept on hand ready for use, and the day is past when the practitioner can waste time in the laborious task of making up stock medicines.

Of the many preparations sent out by this firm it is difficult to select special ones for notice, but the following we have tried extensively and can recommend:—

Huxley's Plasma Dressing, Vetodyne, Colicide Mixture, Ung : Iodoleine, Mist : Bismuth et Pepsin, Antiseptic Powder for Dressing Wounds, Ku-gloids, Liquor Cresolis (a very efficient antiseptic agent), Colchi-Sal Capsules, Fluid-Dog Soap, Shampoo Powders for Dogs, Dry Shampoo for Dogs.

These specialities are put up in any style that the practitioner may desire, and effect a great saving of time. Private formulæ can also be put up, and the firm spare themselves no trouble in catering for the requirements of practitioners.

"SAL-ANTISEPTICUS"

(VETERINARY)

A SOLVENT OF MUCINE AND PUS FOR IRRIGATING
SINOUS CAVITIES.

Containing Phenol, Benzo-Boracic Acid, Thymol, etc.

IN POWDER OR TABLET FORM

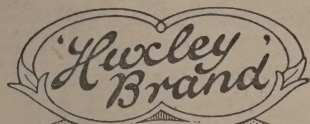

A SUBSTITUTE FOR CHINOSOL.

In 5% solution it is equal to 1 in 1,000 solution Bichloride of Mercury, and superior to 2% Carbolic solution.

When dissolved in water it is employed as a microbicide in Vaginitis, Leucorrhœa Nasal Gleet, Washing Wounds, Sores, Ulcers, Gangrenous parts, etc.

1 lb. Bottles powder, 2/6.

Tablets : 100 1/9 ; 500 6/6 ; 1,000 12/-.

DERMAFOAM

CLEANS THE HANDS

HAVE CLEAN HANDS

THOUGH YOUR WORK IS DIRTY

Without using abrasives. Removes Oil, Grease, Paint, ingrained Metallic Dust, etc., from the skin pores. Specially for Engineers, Mechanics and Motorists, Printers, etc.

IN VERY LARGE TUBES 1/-.

HUXLEY BRAND

DERMAFOAM

'DERMAFOAM'

A recently discovered oil soluble emulsion which facilitates extraction of dirty deposits in the skin tissues.

The actual functions of "DERMAFOAM" are exemplified by these facts. The Hands of Artisans in daily contact with Mineral Oil, Grease, Carbon, Dyes or Metallic Dust, become hard, coarse, and pore-clogged with ingrained matter very difficult to remove.

Ordinary soap, even when combined with abrasives only partially removes dirt, and, as the abrasive process cannot be carried to extreme limits without serious damage to the skin, the solution of the problem demands a solvent harmless to the skin yet capable of penetrating the pores and emulsifying grease before the ordinary process of washing.

Endeavours to cleanse the hands with Turpentine, Petrol or Paraffin aggravates already irritated skin surfaces, and certain forms of eczema or dermatitis are frequently traceable to the continued use of mineral oils and solvents.

"DERMAFOAM" is the skin cleanser par excellence, simple in use and keeps the skin supple and healthy, a small quantity worked into the arms and hands before using water, emulsifies the grease which is easily rinsed away, with hot or cold water.

SOLD IN LARGE COLLAPSIBLE "TUBELETTES" 6d. & 1/-

HUXLEY'S ANTISEPTIC PLASMA DRESSING.

Composition : Kaolin, Kieselgühr, Salol, Boric Acid, Phenol Hydrate, Ol. Gaultheria, milled to plastic paste consistency with Compound Glycerole of Starch.

INDICATIONS :—As an absorbent cleansing, hygroscopic poulticing medium for reducing Inflammation or Congestion arising from Glandular Enlargement, Acute Tendonitis, Periostitis, and for wounds generally.

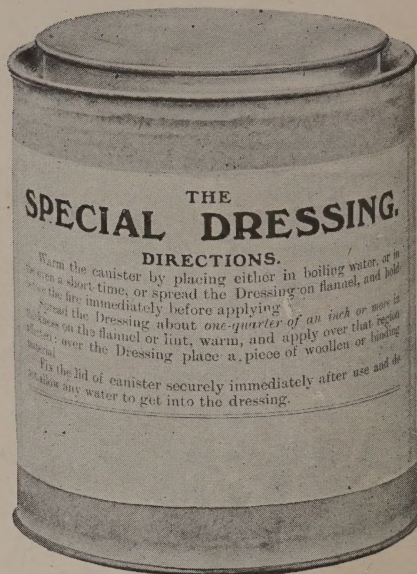

Hygroscopic and heat retaining properties, place this preparation in the front rank, for dressing injuries to Hunters caused by Splints, Barbed Wire, etc.

HOW TO APPLY.

For septic wounds and inflammation apply hot spread upon flannel to the affected lesion, covering the flannel with rolled or felted cotton wool, in close contact with the skin, allowing the Dressing to remain undisturbed for 10 to 20 hours.

For inflammation or tendonitis in Race Horses apply a flannel bandage of warm Plasma Dressing reaching from the fetlock to the knee covering over with felted wool bound round in the usual manner.

For "foul-in-the-foot" trim the parts and cleanse with weak carbolic solution before applying the Dressing, on flannel, covering with felted wool, or waterproof material.

We have about a dozen styles of label to select from, varying in colour and description, as illustrated

"LUSTREX" COATSHINE.

For promoting a glossy coat, particularly useful when preparing the animal for exhibition.

4-OZ. Bottles, 7/6 doz., labelled with client's name and address.

"Pulv-Tabs" registered name for Powder Tablets.

'Pulv-Tabs' are readily crushable, or easily administered whole. The above powders can be supplied made in "Pulv-Tabs."

There is some satisfaction in knowing that when a 'Pulv-Tab' has been swallowed the whole dose has been properly given, which cannot always be said of powders.

Bottles of 100 'Pulv-Tabs,' 2/- ; Quantities at quoted rates.

Introductory - -

TO OUR FRIENDS, THE VETERINARY PRACTITIONERS.

In presenting to you our Price List we desire to express thanks for your co-operation and valued patronage, and to assure you we continue to offer the highest standard of quality at competitive prices consistent with quality of ingredients and super finish of external appearance.

With the confidence of 35 years' experience in compounding Official, Non-Official and "Huxley's Medical Products" you may feel assured all articles bearing our Label are superior in many cases, and equal in all, to those of any manufacturer.

Our Products are guaranteed true to Label, and would conform to the Pure Drug Law of any Country, and we will at all times, serve you with promptness and courtesy.

CONTAINERS :- No charge is made for Bottles, Tins, or Packing Cases on standard lines, obviating the cost and trouble of returns. Carriage paid on orders of £2.

PRICES :- - - Goods are invoiced at prices in force on the day the order is given to our Representative, or date of Post Mark when mailed direct.

TRADING TERMS :- Net Cash on the 10th. of the month following delivery or by special arrangement with our representatives. Cheques remitted, should be made payable to the Company and crossed Westminster Bank, Croydon.

CLAIMS :- - - For shortage or damage should reach us promptly (within ten days) as orders are double checked and every care exercised in packing.

LABELS :- - - Loose labels, for manifest reasons, cannot be supplied. We hold ourselves responsible for all products bearing our labels, and could not do so if we allowed labelling to be executed without our supervision.

PRIVATE FORMULÆ & SPECIAL PURCHASES :- It must be clearly understood, where preparations have been specially compounded, the buyer must take the quantity ordered in one delivery and the Company cannot accept responsibility for incompatibility, or other defects which may arise.

For this reason we prefer to submit a sample for confirmation, as goods so supplied cannot be returned.

HUXLEY'S FISH-TAIL BOUGIES

FOR INFLAMMATION OF THE TEATS.

Cylindrical shaped delicately smooth bougies prepared with multi-strands of cotton moulded with "Sal-Antisepticus".

These original Bougies introduced by Huxley's in 1906 immediately superseded the single strand variety which were easily broken. They may be used repeatedly, after applying a new coating of the Special Colourless Antiseptic which is included with each box of bougies.

Supplied in Bulk, 14/- per gross
